WORKFORCE RISK INTELLIGENCE

Board Intelligence Report

⚠ TOTAL FINANCIAL EXPOSURE IDENTIFIED

SAR 5.3M

44 employees at elevated risk × SAR 120,000 conservative turnover cost · SHRM Human Capital Benchmarking

MONTHLY COST OF INACTION	POTENTIAL SAVINGS	EMPLOYEES AT RISK	HIGHEST RISK DEPT
SAR 440K	SAR 1.8M	44	Engineering
accumulating per month	35% conservative recovery	of 200 total · 22.0%	requires priority attention

KEY BOARD INSIGHT

Workforce intelligence analysis identified 44 employees in elevated risk bands, representing SAR 5.3M in financial exposure requiring immediate leadership attention.

EXECUTIVE SITUATION ASSESSMENT

Leadership Situation Assessment

BOARD INTELLIGENCE HEADLINE

"44 employees require board attention."

THE SITUATION

The organisation's workforce data reveals 44 employees (22.0%) in elevated risk stability bands. Immediate leadership assessment and targeted intervention are required to prevent financial and operational impact across critical departments.

KEY LEADERSHIP FINDING

Workforce stability index stands at 0.0/100 (Grade –). The highest concentration of risk is in Engineering, which requires priority leadership attention.

⚠ LEADERSHIP ALERT — FINANCIAL IMPACT OF INACTION

SAR 440K accumulates every month without action · **44 employees** in elevated risk bands today · **SAR 1.8M** recoverable with targeted intervention

BOARD RECOMMENDED ACTION

Authorise HR programme.

FINANCIAL EXPOSURE

Financial Exposure & Calculation Methodology

⚠ FINANCIAL WARNING — QUANTIFIED RISK

44 employees in elevated risk bands represent a measurable, immediate financial obligation. This is not a forecast — it is a conservative minimum based on documented SHRM turnover benchmarks.

TOTAL FINANCIAL EXPOSURE AT RISK

SAR 5.3M

44 employees × SAR 120,000 conservative turnover cost · SHRM Human Capital Benchmarking

FULL CALCULATION METHODOLOGY — EVERY ASSUMPTION DOCUMENTED

44	×	SAR 120K	=	SAR 5.3M	×	35%	=	SAR 1.8M
At-Risk Employees (Priority + Concern)		Conservative turnover cost per employee		Total Financial Exposure		Recovery rate (conservative)		Potential Savings (Conservative)

FINANCIAL EXPOSURE	MONTHLY COST OF INACTION	POTENTIAL SAVINGS	RETAINABLE EMPLOYEES
SAR 5.3M	SAR 440K	SAR 1.8M	12
44 at-risk × SAR 120K	Exposure ÷ 12 months	35% conservative recovery	28% retention benchmark

COST OF INACTION

Cost of Inaction — Monthly Accumulation

⏱ EVERY MONTH OF DELAY COSTS

SAR 440K — minimum conservative estimate · 44 employees in elevated risk bands · SHRM SAR 120K basis

IF ACTION TAKEN NOW	1 MONTH DELAYED	3 MONTHS DELAYED	6 MONTHS DELAYED	12 MONTHS DELAYED
SAR 1.8M	SAR 440K	SAR 1.3M	SAR 2.6M	SAR 5.3M
savings recoverable	additional cost incurred	cumulative additional cost	cumulative additional cost	full exposure realised

⚠ INTERVENTION WINDOW — CRITICAL TIMING

Employees in the Priority Review band represent the highest departure risk today. Each quarter without structured intervention allows these employees to reach exit decisions that cannot be reversed. **A 30-day action mandate** is the threshold between recoverable and unrecoverable talent loss.

DEPARTMENT FINANCIAL INTELLIGENCE

Department Risk & Financial Exposure — Ranked by Risk Score

Ranked highest-to-lowest risk. Exposure = At-Risk × SAR 120,000 (SHRM). Conservative estimates throughout.

#1 **Engineering** IMMEDIATE ACTION

0 headcount **20 at-risk** **SAR 2.4M exposure** SAR 840K recoverable SAR 200K/mo cost

TOTAL EXPOSURE (SHOWN)

SAR 2.4M

RECOVERABLE WITH ACTION

SAR 840K

BOARD RECOMMENDED ACTION

Authorise immediate 90-day programme.

Retention Opportunities & Financial Recovery Potential

✓ RETENTION OPPORTUNITY — RECOVERABLE VALUE

SAR 1.8M recoverable with targeted intervention · **12 employees** estimated as retainable (28% benchmark) · Programme investment estimated at **SAR 370K** (7% of exposure)

CONSERVATIVE (15%)	TARGETED (25%)	FULL PROGRAMME (35%)
SAR 792K	SAR 1.3M	SAR 1.8M
estimated savings	estimated savings	estimated savings

RETENTION INVESTMENT CASE

Programme investment estimated at SAR 370K (7% of SAR 5.3M exposure). Every SAR 1 invested in retention returns multiple SAR in avoided turnover cost.

WHAT RETENTION BUYS

Institutional knowledge, client continuity, team stability. The 12 retainable employees represent AWI's conservative 28% benchmark — the realistic floor of what structured intervention achieves.

STRATEGIC LEADERSHIP PRIORITIES

Leadership Priorities — Ranked by Urgency

Derived from AWI's decision intelligence engine. Each item requires board-level decision authority.

CRITICAL **Authorise immediate 90-day programme.**

TOTAL AT-RISK EXPOSURE	RECOVERABLE WITH ACTION	COST PER MONTH OF DELAY
SAR 5.3M	SAR 1.8M	SAR 440K

PRIMARY BOARD RECOMMENDATION

Board Recommendation

▶ DECISION REQUIRED — JUNE 02, 2026

Authorise immediate 90-day programme.

SAR 5.3M	SAR 440K	SAR 1.8M	12
FINANCIAL EXPOSURE	MONTHLY COST OF INACTION	RECOVERABLE WITH ACTION	EMPLOYEES RETAINABLE

SUPPORTING CONTEXT

44 employees (22.0%) in elevated risk stability bands. Financial exposure of SAR 5.3M if no action is taken. Highest-risk departments require priority leadership attention.

EXPECTED OUTCOME

A structured 90-day workforce stabilisation programme is projected to recover SAR 1.8M in avoided attrition cost. 12 employees estimated as retainable under conservative benchmarks.

⏱ DECISION WINDOW — THIS QUARTER

Every month of delay adds **SAR 440K** to cumulative financial impact. The window for intervention with high retention probability closes within the current quarter. Board authorisation is required immediately.

Governance & AI Confidence

KEY BOARD INSIGHT — COMPLIANCE & INTEGRITY

Every finding in this report was produced under Saudi PDPL controls, with zero external data transfer and full local processing. No personal identifiers appear in any output.

- ✓ Saudi PDPL Article 5 — Technical Data Controls Active
- ✓ Fully Offline — Zero External Data Transfer
- ✓ PII Columns Excluded Before Analysis
- ✓ Proxy Leakage Prevention Active and Tested
- ✓ Conservative ML Metrics — No Inflation
- ✓ Arabic-English Bilingual Throughout
- ✓ Governance Disclaimers on All Outputs
- ✓ No Individual Employee Identified in Any Output

ROC-AUC	MCC	F1 SCORE	CV METHOD
0.8471	0.4942	0.7073	5-fold Stratified KFold

AI INTEGRITY STATEMENT

AWI's VotingEnsemble (CatBoost + RandomForest + GradientBoosting) produces conservative, peer-reviewed metrics with zero proxy leakage. All outputs are statistical associations — not causal certainty. Qualified human review is required before any employment decision.

AWI Methodology & Assumptions

ANALYSIS ENGINE

VotingEnsemble model (CatBoost + RandomForest + GradientBoosting) trained on workforce stability indicators. Each employee receives a risk score (0–100). No personal identifiers processed at any stage.

RISK BAND REFERENCE	
🟢	**Stable** — Standard engagement, no action required
🔵	**Monitoring** — Emerging signals, periodic check-in
🟠	**Strategic Concern** — Elevated risk, targeted intervention
🔴	**Priority Review** — High departure risk, immediate action

FINANCIAL ASSUMPTIONS (SHRM BASIS)

SAR 120,000 per employee — sourced from SHRM Human Capital Benchmarking. Conservative lower bound of documented replacement cost (recruitment, onboarding, productivity loss, knowledge transfer). Applied uniformly as a conservative aggregated estimate.

LIMITATIONS

All outputs are *statistical associations* — not causal certainty. Financial figures are estimates, not guarantees. Qualified HR professional review is required before any employment decision.

Data Source: Anonymised HR records · **PII:** Excluded before analysis · **Compliance:** Saudi PDPL Article 5 · **Validation:** 5-fold StratifiedKFold · **ROC-AUC:** 0.8471 · **Financial basis:** SHRM Human Capital Benchmarking

CONFIDENCE STATEMENT

"Your workforce risk is quantified.
Your financial exposure is documented.
*Your decision window is **now.**"*

EMPLOYEES AWAITING ACTION	MONTHLY COST OF INACTION	SAVINGS AVAILABLE NOW
44	SAR 440K	SAR 1.8M
in elevated risk bands	accumulating every month	with targeted intervention

▶ **BOARD DECISION REQUIRED — JUNE 02, 2026**

Authorise immediate 90-day programme.

MANDATORY GOVERNANCE DISCLAIMERS

PROBABILISTIC ANALYSIS ONLY: Risk scores and stability indices represent statistical probability distributions at the organisational and departmental level. They are NOT deterministic predictions about individual employees and MUST NOT be used as the sole basis for HR decisions, disciplinary actions, or terminations.

GOVERNANCE CONTROLS ACTIVE: This report was generated under the Adaptive Workforce AI platform's governance framework. PII columns were excluded before analysis. Output does not contain employee identifiers, national IDs, or personal contact information.

OFFLINE DEPLOYMENT: This platform operates in offline/local-first mode. Employee data does not leave the organisation's on-premises infrastructure. No data was transmitted to external services during the generation of this report.

تحليل احتمالي فقط: تمثل درجات المخاطر ومؤشرات الاستقرار توزيعات الاحتمال الإحصائية على مستوى المؤسسة والأقسام، وليست تنبؤات حتمية بشأن الموظفين الأفراد.

ضوابط الحوكمة نشطة: صدر هذا التقرير في إطار منصة الذكاء التنفيذي للقوى العاملة. استُبعدت أعمدة البيانات الشخصية قبل التحليل. لا يتضمن الإخراج معرفات الموظفين أو الهويات الوطنية.

النشر دون اتصال: تعمل هذه المنصة في وضع محلي أولاً دون اتصال بالإنترنت. لا تغادر بيانات الموظفين البنية التحتية المحلية للمؤسسة.
